

EDUCATION

California State University, Los Angeles
Master's degree – MAY '17

Computer Science

Gujrat technology University

Bachelor's degree – JUN '14

Computer Science & Engineering

SKILLS

Programming languages

• Proficient with:

JavaScript, Python, Java, SQL,
Bash, Objective C,

• Familiar with:

Go, .Net, Swift, GraphQL, PHP

Frameworks & Libraries

• **Proficient with:** React, Redux,
Angular x., Node/Express, jQuery,
MongoDB, ES6, AJAX, Adobe
tools

• **Familiar with:** D3.js, LeapJS, EJS,
AWS, Microservices, Shopify

Tools

Android SDK+Studio, Xcode,
Eclipse, Atom, Sublime

Version control: Git, Jira, Agile

I'M ALSO A ...

- full-stack web developer
- native app developer
- front-end web developer
- fan of Counter-strike

CERTIFICATE

- udacity nanodegree :ReactJS, Redux, React native
- Oracle Certified Professional, Java SE
- Udemy : Adobe Photoshop
- Udemy : Adobe After-Effect

WORK EXPERIENCE

Shreenath Inc.

Web Developer intern

Los Angeles, CA

JAN 2017 – APR 2017

- Built modern, interactive websites using JavaScript(ReactJS) and UI frameworks.
- Collaborated with cross-functional teams to define, design and ship new features.

PPC System

Software Developer intern

East Hanovar, NJ

Jul 2016 – Dec 2016

- Collaborated with web application architect and backend developers on JSON API design.
- Designed and implemented a robust and modernized web application architecture involving React, Redux and ES2015 using gulp, webpack to develop the system.

iClerisy Solution

Front End Engineer

Ahmedabad, GJ

AUG 2014 – AUG 2015

- Built web app (AngularJS) and RESTful API for iClerisy to perform maintenance checks on deployed hardware.
- Tested with Jasmine and Mocha following Agile methodology.

Silver Oak College (SOCET)

Design Engineer

Ahmedabad, GJ

JUL 2013 – JUN 2014

- Collaborating with cross-functional teams to define, design, and ship new features.
- Implemented task allocation, notification, file binding, Checklist.

PROJECTS

Meal Tracking App

Redux, React

- Developed integrated react-redux framework for tracking meal weekly and recommend shopping list for that particular meal.

Stackchat

Redux, React.js, Socket IO, Node, AJAX

- Stack-chat was build to understand concepts of redux library and how to use both react and redux for a single application.
- Stack-chat is a real time chat application in which we can create a channel, post a message to a channel.

Chat Application

Angular, NodeJS, Bootstrap, Express, Socet.io

- It's **real time application**, where users chat live with each other, we also implemented white-board for users to draw messages for communication.

Twitter User Gender Classification

Python, scikit learn algorithms

- Incorporated machine learning to predict gender using twitter data.

Fitness Native Application

React-Native, expo, web-api

- Design Mobile Application using **react-native** library to integrate individual fitness goals by tracking activity and workouts.
